

American Society of Transplant Surgeons (ASTS) and Transplant Accreditation & Certification Council (TACC) understand that ASTS members, external researchers, and others may have an interest in data related to fellowship training. Such inquiries must be submitted to ASTS and TACC in writing via the **ASTS Data Request Form**. Data requests associated with a committee project should not be submitted until the project is approved by ASTS Council. Individual ASTS members performing their own research outside the ASTS committee structure may be provided de-identified data for select projects as deemed appropriate by the ASTS Council.

Any whitepaper or publications generated from these data must be provided to ASTS prior to submission for publication. Committee members who receive these data as part of a committee project are not eligible to use this data for personal research projects without prior approval. Requests associated with a committee chair report must be submitted 30 days before the report deadline.

Any surgical log data will include deidentified fellowship surgical log entries but will not include program specific information. Data will only be provided from fellows who have agreed to have their data distributed. ASTS reserves the right to not distribute the data.

Fee:

A fee is associated with this request. No data request will be fulfilled until payment is received.

- ASTS Member fee: \$250
- Non-member fee: \$500

Distribution:

Fulfillment of these requests is dependent upon ASTS Staff time and a timeframe will be provided on a case-by-case basis.

Individual data:

Previous fellows who are requesting their own fellowship data within 5 years of fellowship can access the data at no cost. Institutions who are undergoing UNOS review can also request the data at no cost.
